

The GBC SmartPunch supports commonly used binding styles such as Color Coil®, WireBind®, CombBind®, VeloBind®, ProClick® and 3-hole.

GBC® SmartPunch™

In-line Punching System for the MX-M850/M950/M1100

Add Style and Versatility to Bound Documents

Providing professionally bound finished documents to your customer is now easier than ever with the GBC SmartPunch in-line punching system. With up to six common punching styles, the GBC SmartPunch system can produce ready-to-bind documents at speeds up to 85, 95 and 110 pages per minute when connected to an MX-M850, MX-M950 or MX-M1100 Series Document System.

Create Professionally Bound Documents In-House

The GBC SmartPunch system gives you the flexibility to prepare ready-to-bind documents right from the MX Series operation panel or print driver screen. Enhance productivity and reduce costs by combining printing, collating and punching into one convenient step. Need to make on-the-fly changes to presentations, reports, proposals or other projects? With the GBC SmartPunch connected to an MX-M850/M950/M100 Series Document System, it's as easy as 1-2-3. Additionally, with finishing features that include Z-Folding and Post-Sheet Insertion, as well as punching capacity for up to 80 lb. cover, an MX-M850/M950/M1100 Document System with a GBC SmartPunch can quickly produce a variety of ready-to-bind professional documents.

Maximize Productivity

With the seamless integration provided by the GBC SmartPunch and MX-M850/M950/M1100 Series Document System, you can keep pace with all of your production needs. The GBC SmartPunch also reduces production time by eliminating the need for off-line manual punching, which typically slows down your overall productivity. With the GBC SmartPunch, you can gain more control of your production projects and realize cost savings for the jobs that no longer need to be outsourced.

An Integrated Punch System That is Easy to Use

The GBC SmartPunch is designed for both casual users and production professionals. The fully integrated system combined with Sharp's large 10.1" touch-screen display makes it easy for walk-up users to set up complex ready-to-bind jobs with limited training. With Sharp's intuitive print driver interface, users can also initiate ready-to-bind print jobs right from their computer desktop. Interchangeable tool-less die sets make it simple to switch binding styles.
